

LIFESTYLES

PROGRAM TITLE: NEWS 3 @ 6am

TYPE: News

DATE OF BROADCAST: 1-19-10

DESCRIPTION: Supplies are high, but the demand is not – people are not protecting themselves against H1N1. According to the CDC only 20 percent of Americans are vaccinated against H1N1. Medical experts are afraid the next big wave could be coming in the next few weeks, and they say now is the time to get the vaccine.

PROGRAM TITLE: NEWS 3 @ 11pm

TYPE: News

DATE OF BROADCAST: 1-24-10

DESCRIPTION: Last week we told you about the local chapter of the Red Cross struggling to help local fire victims, due to so many helping the victims in Haiti. They were short more than 100 thousand dollars. We're happy to report that after watching our story, Southern Nevada firefighters stepped in with a 10 thousand dollar donation. There is still a need for local donations.

PROGRAM TITLE: NEWS 3 @ 11pm

TYPE: News

DATE OF BROADCAST: 1-23-10

DESCRIPTION: Look good and help fight Autism. That's what folks got a chance to do tonight at the first "Fashion for Autism Las Vegas" event at the Four Seasons. All the money raised will go to help families in Nevada who are affected by Autism.

PROGRAM TITLE: NEWS 3 @ 6pm

TYPE: News

DATE OF BROADCAST: 1-23-10

DESCRIPTION: If your child gets sick during the night you only have a few options, and one is the emergency room. Now there is a new clinic trying to help. Good Night Pediatrics provides overnight care everyday of the week for children with non life threatening illnesses. The center located on Green Valley Parkway is staffed with pediatricians who will treat your child from 5pm until 5am. The clinic co-pay is cheaper than going to the hospital.

PROGRAM TITLE: NEWS 3 @ 6pm

TYPE: News

DATE OF BROADCAST: 3-10-10

DESCRIPTION: Good news to report regarding the spread of H1N1. The number of people being infected in Clark County is way down. Even so, experts at the Health Department say it's still important to protect yourself, and that this might be the best time to do it. The long lines we saw a few months ago are almost non-existent. Do it now, and you'll be protected into the next flu season.
